

**Website shortcuts**

This will serve as a guideline to create shortcuts for our website on mobile devices.

**Apple IOS**

Launce Safari on the home screen. Type Eversdal Primary in Google (or type in www.eversdal.org.za). When the search results appear, click on Eversdal Primary school. The website will open. Choose the specific page inside the website you want to create the shortcut for. For example: communications. At the bottom of the screen, press the export button (the button with the square and the arrow). Choose “add to home screen.” Type in the name or keep the default name and click add. The icon will appear on your home screen like any other app shortcut or app, so you can drag it around and put it wherever you like. **You can follow the photos from left to right to see all the steps.**
