Waterwys/ Water wise

By: Lee-Ann Salusalu, Kadie Cairncross and Chloe Petesern

Ons is tans in 'n droogte in Suid-Afrika. Water is getting very scarce and therefore we suggest you start buying water and of course SAVE a lot of it aswell.

Hier is 'n paar idees oor hoe om water te bespaar:

Dit mag vreemd lyk, maar:

1. Shower with the clothes you want to be washed.
2. Hergebruik Water
Gebruik die oorblywende water wat jy gehad het vir middagete of van iets om plante te water, skottelgoed te was of gebruik dit om tande te borsel.
3. Wear it till it stinks
Don't wear your clothes once wear them twice or thrice so you don't constantly wash clothes which waste water.
4. Bucket System
Put a bucket or even 2 under the shower to save water.
5. Krane
Maak die kraan toe terwyl jy stort, tandeborsel of jou gesig was.

Those are just a few ideas of saving water. There are many ways to save water. Elke dag kom ons nader en nader aan die dag waar ons water op is. Ons kan dit stop deur water te bespaar. Ons moet probeer om minder as 50 liter water per persoon per dag te kry, hoewel die perk 87L per persoon per dag is.

Find new ways to save water Be CREATIVE. PLEASE try your best in saving water even a little drop count and every person can make a BIG difference.
